## SKILLS

- Extensive experience across a variety of healthcare settings.
- Clients with complex needs.
- Collaborative working.
- Medical Assessments, diagnosis and prescribing.
- Goal setting and monitoring.
- Complex problem solving.
- Community Rehabilitation.
- Working with those with acquired brain injury.

## PROFILE

As an Advanced Clinical Practitioner, I possess a unique blend of clinical expertise, leadership skills, and a patient-centred approach that is essential for effective clinical case management.

My experience in conducting holistic assessments, developing comprehensive care plans and advocating for patient involvement has equipped me with the necessary skills to manage complex cases.

I am registered with BABICM and HCPC, which underscores my commitment to maintaining high standards of practice and continuous professional development.

My ability to collaborate with multidisciplinary teams and navigate healthcare systems ensures that I can provide optimal care tailored to individual patient needs.

## EXPERTISE

- Extensive experience across a variety of healthcare settings, including primary care, clinical rehabilitation, and training.
- Managing complex cases involving clients with multiple needs with a focus on rehabilitation strategies.
- Conducting holistic assessments to evaluate clinical, psychosocial, environmental, and functional needs.
- Collaborating with multidisciplinary teams to develop and implement individualised care and rehabilitation plans.
- Performing medical assessments, diagnosis, and prescribing treatment while ensuring client-centered care at every step.
- Advocacy for client and family involvement in care decisions.
- Navigating healthcare systems and coordinating care pathways.
- Comprehensive understanding of the rehabilitation process, including goal setting and progress monitoring.
- Expertise in managing highly stressful scenarios and resolving complex communication challenges.
- Adapting communication styles to engage with cognitively impaired clients.
- Complex problem-solving and strategic decision-making in challenging situations.
- Client advocacy and education to promote recovery and independence.
- Advanced diagnostic, prescribing, and decision-making capabilities.
